INSTITUTION RATING

INSTITUTION'S CRA RATING: This institution is rated **Satisfactory**.

An institution in this group has a satisfactory record of helping to meet the credit needs of its assessment area, including low- and moderate-income neighborhoods, in a manner consistent with its resources and capabilities.

The bank's Community Reinvestment Act (CRA) performance under all applicable criteria supports the overall rating. The following points summarize this performance.

- The loan-to-deposit ratio is reasonable given the institution's size, financial condition, and credit needs of the assessment area.
- A majority of the reviewed loans are in the institution's assessment area.
- The geographic distribution of loans reflects reasonable dispersion throughout the assessment area.
- The distribution of borrowers reflects reasonable penetration among businesses of different sizes and individuals of different income levels.
- The bank did not receive any CRA-related complaints since the previous evaluation; therefore, this criterion did not impact the rating.

DESCRIPTION OF INSTITUTION

Carson Bank is a full-service community bank headquartered in Mulvane, Kansas. Mulvane Bankshares, Inc., in Mulvane, Kansas, a one-bank holding company, wholly owns the institution's outstanding stock. Carson Bank received a Satisfactory rating under the Interagency Small Institution Examination Procedures at its prior FDIC performance evaluation dated February 12, 2018.

Carson Bank operates four full-service offices in south central Kansas, which are located in Sedgwick and Sumner counties. The offices are in Mulvane (2), Derby, and Wichita. In 2020, the bank relocated the Madison Street branch in Derby to a new location approximately 1.5 miles away; however, continues to serve the same market. The bank has not been involved in any mergers or acquisitions since the previous evaluation.

The institution offers traditional home mortgage, commercial, agriculture, and consumer loans, as well as government guaranteed loans through the Small Business Administration. The bank also originated loans under the Small Business Administration's Paycheck Protection Program (PPP), which was established in 2020 to provide relief to small businesses during the Corona Virus Disease 2019 (COVID-19) pandemic. Home mortgage lending includes loans retained in the portfolio, as

well as loans sold on the secondary market. The primary lending focus continues to be commercial and home mortgage loans.

The bank provides a variety of deposit services including checking, savings, money market deposit accounts, and certificates of deposit. Alternative banking services include internet and mobile banking, electronic bill pay, and four bank-owned ATMs.

According to the September 30, 2023 Reports of Condition and Income, the institution reported total assets of \$187.1 million, total loans of \$120.2 million, and total deposits of \$155.3 million. The following table shows the distribution for each loan category by dollar volume.

Examiners did not identify any financial, legal, or other impediments that would affect the bank's ability to meet the credit needs of the assessment areas.

DESCRIPTION OF ASSESSMENT AREA

The CRA requires each financial institution to define one or more assessment areas within which its CRA performance will be evaluated. Carson Bank has designated one assessment area, which is comprised of Sedgwick and Sumner counties. These adjacent counties make up a portion of the Wichita, Kansas Metropolitan Statistical Area (MSA). The bank's designated assessment area has not changed since the previous evaluation.

Economic and Demographic Data

This assessment area consists of 141 census tracts, including 8 low-, 42 moderate-, 54 middle-, 35 upper-, and 2 unknown-income census tracts. The following table illustrates select demographic characteristics of the assessment area.

Demographic Information of the Assessment Area						
Demographic Characteristics	#	Low % of #	Moderate % of #	Middle % of #	Upper % of #	NA* % of #

Source: 2020 U.S. Census and 2023 D&B Data Due to rounding, totals may not equal 100.0%. (*) The NA category consists of geographies that have not been assigned an income classification.						

The 2023 D&B data indicates the services industry represents the largest portion of businesses at 37.0 percent; followed by non-classifiable establishments at 17.7 percent; and finance, insurance, and real estate at 12.7 percent. Agricultural operations comprise 3.5 percent of assessment area businesses. The data also indicates a notable number of area businesses are relatively small, with 90.4 percent having 9 or fewer employees, and 89.8 percent operating from a single location.

Examiners used the Federal Financial Institutions Examination Council's (FFIEC) median family income figure for the Wichita, Kansas MSA in 2022 to analyze home mortgage Borrower Profile performance. This figure, along with the corresponding income thresholds, is shown in the following table.

Median Family Income Ranges				
Median Family Incomes	Low <50%	Moderate 50% to <80%	Middle 80% to <120%	Upper ≥120%
2022 (\$85,700)	<\$42,850	\$42,850 to <\$68,560	\$68,560 to <\$102,840	≥\$102,840
<i>Source: FFIEC</i>				

Competition

There is significant competition for financial services in this assessment area. According to June 30, 2023 FDIC Deposit Market Share data, there are 43 banks operating 170 offices in the assessment area. Carson Bank has the 16th highest market share, holding 0.8 percent of the market's deposits.

There is also substantial competition for loans in the assessment area. The 2022 HMDA aggregate data showed that 358 lenders reported 16,165 home mortgage loans in the assessment area. Carson Bank ranked 65th, with a 0.4 percent market share. Although the bank is not required to report small business and small farm lending data, aggregate CRA lending data for those reporting institutions (generally large institutions) provides insight on the level of competition and demand for small business and small farm loans. The data for 2021 (the most recent year available) showed 110 lenders reported 9,989 small business loans, and 20 lenders reported 259 small farm loans in the assessment area.

Community Contacts

As part of the evaluation process, examiners contact third parties active in the assessment area to provide insight on the credit needs of the community. This also helps determine whether local financial institutions are responsive to those needs.

For this evaluation, examiners relied on information from a community contact conducted in late 2023 with a community official knowledgeable of the assessment area. The individual noted that the area economy is heavily reliant on Wichita's aircraft industry, which has improved since the COVID-19 pandemic. Specifically, there have not been any notable industry layoffs in recent years. The contact indicated that the area credit needs includes commercial, home mortgage, agriculture, and consumer loans. The individual believes that area financial institutions are favorably regarded and do a good job of serving the community credit needs.

Credit Needs

Based on information from economic and demographic data, the community contact, and bank management, examiners determined that small business and home mortgage loans are the primary credit needs in the assessment area. The area demographics regarding the number of businesses and housing units in the assessment area, as well as data from lenders that report home mortgage and small business loan information supports this conclusion.

SCOPE OF EVALUATION

General Information

This evaluation covers the period from the prior evaluation dated February 12, 2018, to the current evaluation dated January 22, 2024. Examiners used Interagency Small Institution Examination Procedures to evaluate the bank's CRA performance. This evaluation does not include any affiliate lending activities.

Activities Reviewed

Examiners reviewed small business and home mortgage loans to evaluate performance for this evaluation. Examiners selected the loan products reviewed based on the bank's business strategy and loan volume during the evaluation period. Both loan categories received equal weight when drawing overall conclusions because lending activity is similar for both product types. The small farm loan category was not reviewed since the bank's agricultural lending activity is nominal.

For the home mortgage loan review, examiners considered all 70 loans totaling \$12.5 million that were reported on the bank's 2022 Home Mortgage Disclosure Act (HMDA) Loan Application Register. Carson Bank was not a HMDA reporter in 2021. For the small business loan review, examiners focused on 2023 lending activity. Bank records show the institution originated or purchased 102 small business loans totaling \$15.0 million in 2023. Bank management confirmed the institution's lending patterns for the reviewed year would be reasonably representative of the bank's lending throughout the evaluation period for both loan products.

For the Assessment Area Concentration criterion, examiners analyzed all of the home mortgage and small business loans for the respective year of review. The Geographic Distribution and Borrower Profile criterion analyses for both loan products included all of these loans that were extended to borrowers in the assessment area. Examiners used prescribed comparative data for determining performance for the Geographic Distribution and Borrower Profile criterion. HMDA aggregate data for 2022 is the primary standard of comparison for the bank's home mortgage lending performance, and 2023 D&B data is the standard of comparison for the bank's small business lending performance. Although both the number and dollar volume of loans are shown throughout this evaluation, examiners emphasize performance by number of loans because it is a better indicator of the number of individuals and businesses served.

CONCLUSIONS ON PERFORMANCE CRITERIA

LENDING TEST

Carson Bank demonstrated satisfactory performance under the Lending Test. Performance in all evaluated criteria supports this conclusion.

Loan-to-Deposit Ratio

The loan-to-deposit ratio is reasonable given the institution's size, financial condition, and the credit needs of the assessment area. The bank's performance was evaluated based on the average of the 23 quarterly net loan-to-deposit ratios since the previous evaluation. The bank's resulting average net loan-to-deposit ratio is similar to comparable banks during the same evaluation period. Examiners selected comparable banks based on their asset size, geographic location, and product mix. See the following table for details.

Loan-to-Deposit Ratio Comparison		
Bank	Total Assets as of 9/30/2023 (\$000s)	Average Net Loan-to-Deposit Ratio (%)
Carson Bank, Mulvane, Kansas	187,142	71.5
Andover State Bank, Andover, Kansas	188,295	98.5
The Valley State Bank, Belle Plaine, Kansas	188,136	71.7
Conway Bank, Conway Springs, Kansas	102,691	82.2
Vintage Bank Kansas, Leon, Kansas	231,423	73.0

Assessment Area Concentration

As shown in the following table, a majority of the small business and home mortgage loans reviewed were located inside the assessment area.

Lending Inside and Outside of the Assessment Area										
Loan Category	Number of Loans				Total	Dollar Amount of Loans \$(000s)				Total \$(000s)
	Inside		Outside			Inside		Outside

Geographic Distribution

The geographic distribution of loans reflects reasonable dispersion throughout the assessment area. The bank's lending performance in both lending categories supports this conclusion.

Small Business Loans

The geographic distribution of small business loans is reasonable. As illustrated in the following table, the bank's percentage of lending in low-income census tracts exceeds the corresponding demographic data, while the bank's percentage of lending in moderate-income census tracts lags the corresponding demographic data. Several borrowers had multiple loans, which partially skews the data. Therefore, examiners also calculated the bank's lending percentages by the number of borrowers served, as opposed to loans originated. On a per borrower basis, 5.7 percent of borrowers were located in a low-income census tract, and 15.1 percent were located in a moderate-income census tract, which reflects reasonable performance overall.

Geographic Distribution of Small Business Loans

Moderate	21.4	10	11.4	2,778	24.6

Home Mortgage Loans

The geographic distribution of home mortgage loans reflects reasonable dispersion throughout the assessment area. As the following table shows, the bank's home mortgage lending in low- and moderate-income census tracts is comparable to aggregate lending data.

Geographic Distribution of Home Mortgage Loans						
Tract Income Level	% of Owner-Occupied Housing Units	Aggregate Performance % of #	#	%	\$(000s)	%

Borrower Profile

The distribution of borrowers reflects reasonable penetration among businesses of different revenue sizes and individuals of different incomes in the assessment area. The bank's reasonable lending performance for both loan categories supports this conclusion.

Small Business Loans

The distribution of loans to businesses of different revenue sizes is reasonable. As illustrated in the following table, the bank's percentage of lending to small businesses with revenues of \$1 million or less lags the demographic data for this revenue category. Therefore, examiners also calculated the bank's lending percentages by the number of borrowers served, as opposed to loans originated. On a per borrower basis, 66.0 percent of borrowers had revenues of \$1 million or less. Finally, examiners considered the lending performance for two comparable institutions operating in the Wichita area. On a per borrower basis, the percentage of lending to small businesses with revenues of \$1 million or less was 71.4 percent for both comparable banks. Since Carson Bank's percentage

of lending to small businesses with revenues of \$1 million or less on a per borrower basis is similar to the comparable banks, performance is considered reasonable.

Home Mortgage Loans

The distribution of loans to individuals of different income levels is reasonable. As shown in the following table, the bank's level of lending to low- and moderate-income borrowers is similar to the corresponding aggregate lending data for both income categories.

Distribution of Home Mortgage Loans by Borrower Income Level						
Borrower Income Level	% of Families	Aggregate Performance % of #	#	%	\$(000s)	%

Response to Complaints

The institution has not received any CRA-related complaints since the previous evaluation; therefore, this criterion did not affect the rating.

DISCRIMINATORY OR OTHER ILLEGAL CREDIT PRACTICES REVIEW

The bank's compliance with the laws relating to discrimination and other illegal credit practices was reviewed, including the Fair Housing Act and the Equal Credit Opportunity Act. Examiners did not identify any discriminatory or other illegal credit practices.

APPENDICES

SMALL BANK PERFORMANCE CRITERIA

Lending Test

The Lending Test evaluates the bank's record of helping to meet the credit needs of its assessment area(s) by considering the following criteria:

- 1) The bank's loan-to-deposit ratio, adjusted for seasonal variation, and, as appropriate, other lending-related activities, such as loan originations for sale to the secondary markets, community development loans, or qualified investments;
- 2) The percentage of loans, and as appropriate, other lending-related activities located in the bank's assessment area(s);
- 3) The geographic distribution of the bank's loans;
- 4) The bank's record of lending to and, as appropriate, engaging in other lending-related activities for borrowers of different income levels and businesses and farms of different sizes; and
- 5) The bank's record of taking action, if warranted, in response to written complaints about its performance in helping to meet credit needs in its assessment area(s).

GLOSSARY

Aggregate Lending: The number of loans originated and purchased by all reporting lenders in specified income categories as a percentage of the aggregate number of loans originated and purchased by all reporting lenders in the metropolitan area/assessment area.

American Community Survey (ACS): A nationwide United States Census survey that produces demographic, social, housing, and economic estimates in the form of five year estimates based on population thresholds.

Area Median Income: The median family income for the MSA, if a person or geography is located in an MSA; or the statewide nonmetropolitan median family income, if a person or geography is located outside an MSA.

Assessment Area: A geographic area delineated by the bank under the requirements of the Community Reinvestment Act.

Census Tract: A small, relatively permanent statistical subdivision of a county or equivalent entity. The primary purpose of census tracts is to provide a stable set of geographic units for the presentation of statistical data. Census tracts generally have a population size between 1,200 and 8,000 people, with an optimum size of 4,000 people. Census tract boundaries generally follow visible and identifiable features, but they may follow nonvisible legal boundaries in some instances. State and county boundaries always are census tract boundaries.

Combined Statistical Area (CSA): A combination of several adjacent metropolitan statistical areas or micropolitan statistical areas or a mix of the two, which are linked by economic ties.

Consumer Loan(s): A loan(s) to one or more individuals for household, family, or other personal expenditures. A consumer loan does not include a home mortgage, small business, or small farm loan. This definition includes the following categories: motor vehicle loans, credit card loans, home equity loans, other secured consumer loans, and other unsecured consumer loans.

Core Based Statistical Area (CBSA): The county or counties or equivalent entities associated with at least one core (urbanized area or urban cluster) of at least 10,000 population, plus adjacent counties having a high degree of social and economic integration with the core as measured through commuting ties with the counties associated with the core. Metropolitan and Micropolitan Statistical Areas are the two categories of CBSAs.

Family: Includes a householder and one or more other persons living in the same household who are related to the householder by birth, marriage, or adoption. The number of family households always equals the number of families; however, a family household may also include non-relatives living with the family. Families are classified by type as either a married-couple family or other family. Other family is further classified into “male householder” (a family with a male householder and no wife present) or “female householder” (a family with a female householder and no husband present).

FFIEC-Estimated Income Data: The Federal Financial Institutions Examination Council (FFIEC) issues annual estimates which update median family income from the metropolitan and nonmetropolitan areas. The FFIEC uses American Community Survey data and factors in information from other sources to arrive at an annual estimate that more closely reflects current economic conditions.

Full-Scope Review: A full-scope review is accomplished when examiners complete all applicable interagency examination procedures for an assessment area. Performance under applicable tests is analyzed considering performance context, quantitative factors (e.g., geographic distribution, borrower profile, and total number and dollar amount of investments), and qualitative factors (e.g., innovativeness, complexity, and responsiveness).

Geography: A census tract delineated by the United States Bureau of the Census in the most recent decennial census.

Home Mortgage Disclosure Act (HMDA): The statute that requires certain mortgage lenders that do business or have banking offices in a metropolitan statistical area to file annual summary reports of their mortgage lending activity. The reports include such data as the race, gender, and the income of applicants; the amount of loan requested; and the disposition of the application (approved, denied, and withdrawn).

Home Mortgage Loans: Includes closed-end mortgage loans or open-end line of credits as defined in the HMDA regulation that are not an excluded transaction per the HMDA regulation.

Housing Unit: Includes a house, an apartment, a mobile home, a group of rooms, or a single room that is occupied as separate living quarters.

Limited-Scope Review: A limited scope review is accomplished when examiners do not complete all applicable interagency examination procedures for an assessment area. Performance under applicable tests is often analyzed using only quantitative factors (e.g., geographic distribution, borrower profile, total number and dollar amount of investments, and branch distribution).

Low-Income: Individual income that is less than 50 percent of the area median income, or a median family income that is less than 50 percent in the case of a geography.

Market Share: The number of loans originated and purchased by the institution as a percentage of the aggregate number of loans originated and purchased by all reporting lenders in the metropolitan area/assessment area.

Median Income: The median income divides the income distribution into two equal parts, one having incomes above the median and other having incomes below the median.

Metropolitan Division (MD): A county or group of counties within a CBSA that contain(s) an urbanized area with a population of at least 2.5 million. A MD is one or more main/secondary

counties representing an employment center or centers, plus adjacent counties associated with the main/secondary county or counties through commuting ties.

Metropolitan Statistical Area (MSA): CBSA associated with at least one urbanized area having a population of at least 50,000. The MSA comprises the central county or counties or equivalent entities containing the core, plus adjacent outlying counties having a high degree of social and economic integration with the central county or counties as measured through commuting.

Middle-Income: Individual income that is at least 80 percent and less than 120 percent of the area median income, or a median family income that is at least 80 and less than 120 percent in the case of a geography.

Moderate-Income: Individual income that is at least 50 percent and less than 80 percent of the area median income, or a median family income that is at least 50 and less than 80 percent in the case of a geography.

Multi-family: Refers to a residential structure that contains five or more units.

Nonmetropolitan Area (also known as non-MSA): All areas outside of metropolitan areas. The definition of nonmetropolitan area is not consistent with the definition of rural areas. Urban and rural classifications cut across the other hierarchies. For example, there is generally urban and rural territory within metropolitan and nonmetropolitan areas.

Owner-Occupied Units: Includes units occupied by the owner or co-owner, even if the unit has not been fully paid for or is mortgaged.

Rated Area: A rated area is a state or multistate metropolitan area. For an institution with domestic branches in only one state, the institution's CRA rating would be the state rating. If an institution maintains domestic branches in more than one state, the institution will receive a rating for each state in which those branches are located. If an institution maintains domestic branches in two or more states within a multistate metropolitan area, the institution will receive a rating for the multistate metropolitan area.

Rural Area: Territories, populations, and housing units that are not classified as urban.

Small Business Loan: A loan included in "loans to small businesses" as defined in the Consolidated Report of Condition and Income (Call Report). These loans have original amounts of \$1 million or less and are either secured by nonfarm nonresidential properties or are classified as commercial and industrial loans.

Small Farm Loan: A loan included in "loans to small farms" as defined in the instructions for preparation of the Consolidated Report of Condition and Income (Call Report). These loans have original amounts of \$500,000 or less and are either secured by farmland, including farm residential and other improvements, or are classified as loans to finance agricultural production and other loans to farmers.

Upper-Income: Individual income that is 120 percent or more of the area median income, or a median family income that is 120 percent or more in the case of a geography.

Urban Area: All territories, populations, and housing units in urbanized areas and in places of 2,500 or more persons outside urbanized areas. More specifically, “urban” consists of territory, persons, and housing units in places of 2,500 or more persons incorporated as cities, villages, boroughs (except in Alaska and New York), and towns (except in the New England states, New York, and Wisconsin).

“Urban” excludes the rural portions of “extended cities”; census designated place of 2,500 or more persons; and other territory, incorporated or unincorporated, including in urbanized areas.
